In South Africa Social Assistance is subject to means testing which implies that SASSA evaluates the income and assets of the person applying as well as his/her spouse in order to determine whether the person's means are below a stipulated amount. This Means Test is a way of determining whether a person qualifies to receive a grant as grants are indeed meant for those who have insufficient means to support themselves. The Means Test varies from one grant type to another.

Note: Grants for older persons, war veterans and disabled are paid on a sliding scale. that is, the more private income you have, the smaller the government support you may qualify for.
